

**CONSTRUCTION RISK ASSESSMENT  
Hazards That Could Potentially Compromise Patient Care**

This risk assessment must be completed prior to initiating construction of any kind that could compromise fire safety and patient care.

Indicate if there is or is not a risk to patient care in the following areas. Add additional areas that may be pertinent to this pending construction project.

	<b>Risk Present</b>	<b>No Risk Present</b>	<b>Comments</b>
Air Quality Requirements			
Infection Control			
Utility Requirements			
Noise			
Vibration			
Emergency Procedures (exits, etc)			

Have all the ‘‘What If’s’’ been examined? Yes \_\_\_\_\_ No \_\_\_\_\_

Should Interim Life Safety Measures be put into place? Yes \_\_\_\_\_ No \_\_\_\_\_

How should we notify staff , patients, and visitors about this construction and the alterations in procedures/processes that will result?

Who will handle this communication?
