CONSTRUCTION RISK ASSESSMENT
Hazards That Could Potentially Compromise Patient Care

This risk assessment must be completed prior to initiating construction of any kind that could compromise fire safety and patient care.

Indicate if there is or is not a risk to patient care in the following areas. Add additional areas that may be pertinent to this pending construction project.

	Risk Present	**No Risk Present**	**Comments**
Air Quality Requirements			
Infection Control			
Utility Requirements			
Noise			
Vibration			
Emergency Procedures (exits, etc)			

Have all the "What If's" been examined? Yes _____ No _____

Should Interim Life Safety Measures be put into place? Yes _____ No _____

How should we notify staff , patients, and visitors about this construction and the alterations in procedures/processes that will result?

Who will handle this communication?
